PROFILE

Second-year B.Tech Computer Science and Engineering student at VIT Chennai, building toward a career in software engineering. Gaining hands-on experience in web and frontend development, with real-world exposure to product and interface work, functional testing, and AI-assisted workflows.

EDUCATION

Vellore Institute of Technology (VIT), Chennai 2025 - 2029
B.Tech in Computer Science and Engineering (Core)
Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Cloud Infrastructure and Architecture

TECHNICAL SKILLS

Programming: Python, C, C++, Java, SQL
Web: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS
Database: MySQL, Oracle SQL, SQLite
Tools & Platforms: Git, GitHub, VS Code, MySQL Workbench, n8n, Vercel
Concepts: Data Structures, OOP, DBMS, Responsive UI Development, Functional Testing

EXPERIENCE

RSN One - Frontend Developer 31 May 2026 - Present

Intern: 31 May 2026 - 31 August 2026 | Part-time Employee: 31 August 2026 - Present

- Worked on landing-page concepts, visual direction, and AI Concierge interface ideas for the platform's web experiences using Next.js, TypeScript, and Tailwind CSS; currently contributing to the company's app frontend, including app design and testing.
- Designed and refined dark and light HTML email templates for membership and order-related experiences, along with brand imagery and visual theme consistency.
- Conducted QA across the website and the customer, supplier, and admin portals; documented 30 issues across different severity levels.
- Researched customer behaviour and explored product-discovery ideas; supported launch and social-platform activities, iterating on founder and client feedback with AI-assisted design and development workflows.

Mirai Innovations - Web Developer Intern Aug 2026 - Present

- Started from an existing basic HTML concept provided by the company and turned it into a functional, usable website, implementing the required functionality and interactions.
- Continue to make iterative improvements based on direct founder feedback, with the site actively in development.

PROJECTS

Personalized Task Manager Python | MySQL

- Built a Python-MySQL task-management application with authentication, CRUD operations, status tracking, and persistent storage.
- Added search by task name or date, deadline alerts, sorting, and automatic overdue-task detection.

CLUBS & ACTIVITIES

- **Business Innovation Community (BiC)** - Software Department
- **Tech Researchers Club** - R&D and Projects
- **Zero Bugs Club (ZBC)** - Technical Team
